

TURNING AN 80'S **ICON** INTO A PLATFORM OF FUTURE MOBILITY.

OVERVIEW

The future of automobile construction will be highly modular, application specific and user centric. Flexible and innovative companies will develop mobility solutions based on mass produced platforms. To explore, understand and promote this new form of co-development between companies of different sizes and areas of expertise, The Drivery acquired a DMC DeLorean as a community project for its many members and partners to test, showcase and connect their products and services, from electric drivetrain, battery management or connectivity up to autonomous driving.

CORNERSTONES

OPEN INNOVATION

Partners and Members share their ideas and solutions

LEAN DEVELOPMENT MEETS CO-DEVELOPMENT

Common goal setting and planning

THE JOURNEY IS THE REWARD

Sharing and publication of insights, challenges and progress to the public

OPEN TO PARTICIPATION

Any company with a product, service or innovation which might fit this project is welcome to join!
